The figure displays the time evolution of the order parameter S for six different channels. The x-axis represents time t (0 to 150), and the y-axis represents the order parameter S (0.0 to 1.0). A dashed horizontal line at $S = 0.5$ indicates the initial state. All channels show a rapid increase in S starting around $t = 25$, eventually reaching a plateau near $S = 1.0$. The channels are identified in the legend as Ch 104 (blue), Ch 105 (orange), Ch 106 (green), Ch 107 (red), Ch 103 (purple), and Ch 102 (brown).

The figure displays a plot of the expectation value of the Pauli matrix σ_y over time for six channels. The x-axis is labeled 'Time' and ranges from 0 to 150. The y-axis is labeled ' σ_y ' and ranges from -1 to 1. A legend in the top right corner identifies the channels: Ch 128 (blue), Ch 129 (orange), Ch 130 (green), Ch 131 (red), Ch 128 (purple), and Ch 129 (brown). All six channels show a constant value of 0 for the entire duration of the simulation.
