The graph displays the evolution of four components of the vector u over 180 iterations. The x-axis represents the iteration number (0 to 180), and the y-axis represents the value of the components (ranging from -1.5 to 1.5). The components are labeled as Ch 112 (blue), Ch 113 (orange), Ch 114 (green), and Ch 115 (red). All components start at 0 and show a monotonic increase over time. Ch 112 reaches the highest value, approximately 1.0, while Ch 115 reaches the lowest value, approximately 0.1.

The graph displays the time evolution of the expectation value of the Pauli matrix σ_y for six different channels (Ch 144 to Ch 149). The x-axis represents time from 0 to 150, and the y-axis represents the expectation value from -1 to 1. A horizontal dashed line is drawn at $y=0$. All channels start at $y=0$ at time 0 and remain at $y=0$ throughout the time evolution, indicating no change in the expectation value of σ_y .
