The graph displays the evolution of four components of the vector u over 180 iterations. The x-axis represents the iteration number, ranging from 0 to 180. The y-axis represents the value of the components, ranging from -1.5 to 1.5. All four components (Ch 112, Ch 113, Ch 114, Ch 115) remain constant at zero throughout the entire process.

Phase/MG samples

Ch 120 Ch 121 Ch 122 Ch 123 Ch 124 Ch 125 Ch 126 Ch 127

The figure displays a plot of the expectation value of the Pauli matrix σ_y over time for six channels. The x-axis is labeled 'Time' and ranges from 0 to 150. The y-axis is labeled ' $\langle \sigma_y \rangle$ ' and ranges from -1 to 1. A legend in the top right corner identifies the channels: Ch 128 (blue), Ch 129 (orange), Ch 130 (green), Ch 131 (red), Ch 128 (purple), and Ch 129 (brown). All six channels show a constant value of 0 for the entire duration of the simulation.
