The graph displays the time evolution of the expectation value of the Pauli matrix  $\sigma_y$  for six different channels. The x-axis represents time from 0 to 150, and the y-axis represents the expectation value from -1 to 1. A horizontal dashed line is drawn at  $y=0$ . The legend identifies the channels: Ch 136 (blue), Ch 137 (orange), Ch 138 (green), Ch 139 (red), Ch 140 (purple), and Ch 141 (brown). All channels start at  $y=0$  and remain there throughout the time evolution, indicating that the expectation value of  $\sigma_y$  is conserved at zero for all channels.
