The graph displays the average value of the order parameter S for six channels (Ch 104 to Ch 107) over 180 iterations. The x-axis represents iterations from 0 to 180, and the y-axis represents the average value of S from 0.0 to 1.0. All channels show a rapid increase in S , stabilizing at approximately 0.85 after about 20 iterations. Ch 104 (blue) and Ch 105 (orange) reach the highest values, while Ch 106 (green) and Ch 107 (red) reach the lowest values. Ch 106 and Ch 107 show a slight dip around iteration 100.
