The graph displays the evolution of the average number of nodes in the largest component for six channels (Ch 104 to Ch 107) over 180 iterations. The x-axis represents iterations from 0 to 180, and the y-axis represents the number of nodes from 0 to 100. All channels show a sharp increase in the number of nodes in the largest component around iteration 10, reaching a plateau near 100. Ch 104 (blue) reaches the highest plateau at approximately 100. Ch 105 (orange) reaches approximately 95. Ch 106 (green) reaches approximately 90. Ch 107 (red) reaches approximately 85. Ch 108 (purple) and Ch 109 (brown) remain at 0 throughout the iterations.
